

Kismet  Potions

~ ancient offerings for a modern world ~

Product line

Kismet Potions is crafted and created by Kris Wrede

Kris is a gifted aromatic alchemist and an accomplished aroma-therapist. This wisdom blossomed into her skills as a natural perfumer. In this spectrum she is unsurpassed...imparting an uncanny ability to see deep into a person's yearnings, and create the quintessential love potion or bespoke fragrance of your desires.

Perfume in Latin is "per-fumem" or "through smoke" which the ancients used as an offering to the Gods and the universe. They macerated the plants and flowers and burned them on their altars...hence "per fumem". That is one of the many reasons Kris became a perfumer - to make an offering and enable others

to do so every day when wearing her rare and perfect potions. She has a passion for passion and loves to make custom blends and love potions.

Every essential oil has a story and Kris has made it her mission to discover which ones are aphrodisiacs, and which have been used throughout history for love, passion and romance. Her custom blends are made to create a deeper level of experience and sensuality in life, as well as a meaningful connection to the Earth. She is devoted to discovering exotic oils from all over the planet.

The provenance of all the oils used is very important...many of her essential oils are imported directly from South Africa, Morocco, Madagascar, India and Egypt. Only non-sprayed, wild grown, eco-cert or organic oils are sourced. She feels it is important to support small farmers, and the economy and well-being of everyone involved in the process.

Kris has been offering much needed aromatherapy education for many years. This education creates awareness that the choices we make about the products we use and where they are from can make a big difference in ecology and the lives of ourselves, and others. This is a very powerful message. Allow Kris to share her wisdom with you, let her lead you through her world and imagine the possibilities aromatherapy may play in your life.

*Happiness is a perfume you cannot pour on others
without getting a few drops on yourself...Rumi*
